

Made in Sweden

GelTherm®

The heat source is a specially developed foil with the ability to self-regulate power output and thus the temperature (smart heating). Thermostat is superfluous.

GelTherm® is the only gel heater with low voltage design on the market. Low voltage (9V AC) increases electrical safety for patients and staff.

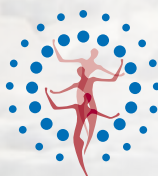

- Made in Sweden
- Provides body temperature gel, $35\pm 3C^{\circ}$
- Fully recyclable
- Complies with all applicable medical directives

Technical data:

- Art.nr: Good12
- Materials: Anodized aluminum
- Dimensions: Height 145 mm, diameter 80 mm
- Heat source: Impact Resistance
- Operating voltage: 230V primary, 9V AC secondary
- CE-marked transformer of plug-in type
- Maximum load 20VA
- CE-marked
