

Made in Sweden

GynoTherm®

GynoTherm® is the only commercially available heat table in low voltage design. The heat source is a specially developed foil with the ability to self-regulate power output and thus the temperature (smart heating). Thermostat is superfluous.

Used for heating of gynecological instruments to comfort temperature (37-40 ° C). Used by gynecologists in hospitals and clinics.

Technical data

- ♥ Art.nr: UJP2ih
- ♥ Material: Stainless steel
- ♥ Dimensions: 530 x 325 mm
- ♥ Heat source: Foil Element (Superimposed Impedance Polymer)
- ♥ Operating voltage: 230V AC primary, 12V AC secondary
- ♥ CE-marked transformer of plug-in type
- ♥ Max load 60W
- ♥ CE-marked
